Author Index

Volume 11

	Page		Page
Berry, L. Joe	155	Mead, S. W.	101
Brachet, Jean	309	Meredith, Howard V.	1
Braun, Armin C.	325	Monod, Jacques	223
Gardiner, Mary S.	155	Regan, W. M.	101
Gilmartin, Rosemary T.	155	Rothen, Alexandre	195
Gregory, P. W.	101	Sonneborn, T. M.	291
Gurchot, Charles	133	Thornton, Dorothy	51
Haddow, Alexander	339	Toennies, Gerrit	185
Hansborough, Louis A.	77, 177	Whiting, P. W.	188
Latimer, Homer B.	61	Williams, Robley C.	205
McKittrick, D. S.	89		

Subject Index

	Page
Abortions and stillbirths in cattle	106
Adaptive enzyme synthesis	271
substrate interactions in	248
Adaptive enzymes and genes	260
Adaptive enzymes in yeast,	
Mendelian segregation of	267
Advances in genetics (review)	188
Amino acid decarboxylases of bacteria	228
formation of	230
Atypical growth in onion roots	155
Bacteria	239
multiplication of, in plants	336
mutable strains	264
Bacteriophage inhibition of enzymatic adaptation	241
Biochemistry of cancer (review)	185
Calf mortality	
relation of inbreeding to	101
Carbohydrases of molds	226
Carbohydrate-attacking enzymes of bacteria	233
Carcinogenesis,	
mechanism of	345
biological considerations,	345
cellular nutrition and	345
Carcinogenic molecule,	
energy states in	344
Carcinogens	
physical properties of	340
chemical relationships	340
Cat	
correlations of organ and body weights in	61
Cattle,	
inbreeding and mortality	101
causes of death in	119
Cell change from normal to neoplastic	333
Cell modulation	279
Cellular nutrition and carcinogenesis	345
Chemical constitution of cytoplasm in the egg	320
Chemical constitution of egg nucleus	320

Page

Chick embryo, ... 77
effect of increased nicotinic acid on development 177
Coefficient of inbreeding in cattle 107
Correlations and variability 71
Correlations between organs in the cat 61, 65
Crown-gall disease of plants 325
Cytoplasmic mechanisms controlling antigenic factors in Protozoa 298
Cytoplasmic (ribo-) nucleic acid 315
Developmental mechanisms in Paramecium 291
Dessication of specimens for electron microscopy 210
Diauxie 249
Differentiation, gene mutation and 284
irreversible 281
nuclear, in clones of Paramecium 303
Dinitrophenol, effect on larval growth 51
Drosophila melanogaster, larval growth of 51
Egg
chemical constitution of 320
chick, development of 77
Electric current
effect on growth of onion roots 155
Electron microscope 205
demonstration of unicellular organisms 216
demonstration of virus 216
difficulties inherent in use of 210
operation of 208
resolving power 207
Electronic stains 213
Embryos,
hybrid 316
injection of 79, 80
polyspermic 316
Enzymatic adaptation 223
and growth 238
kinetics of 245
Enzymatic reactions 200
Enzyme suppression 256
Enzymes,
adaptive and constitutive 243
Galactozymase of yeast 231
Growth
atypical, in onion roots 155
chick 77, 89, 177
developmental 77, 291, 309
diauxic 251
Drosophila 51
enzymatic adaptation and 238
evaluation of 89
larval 51
measurement of 91
statistical evaluation of 95
Growth of lateral roots in an electric field 165
Growth of testicular tumors 133
Growth of upper extremities 1
Growth Society, list of members 359
Growth Symposium 193
Haploid embryos,
nucleocytoplasmic interrelations in 316
Histological study of onion roots 168

	Page
Immunologic reactions	196
Inbreeding in cattle	101
Inbreeding correlated with fertility, size, vigor and mortality	102
Kappa in Paramecium	292
cellular concentration of	294
effect of temperature on	294
Killer, in Paramecium	292
Lateral root growth in onion	168
Length of upper extremities	1
Lethal genes and calf mortality	121
Liver extract in embryonic growth	83
Long range forces in immunologic and enzymatic reactions	195
Malignant transformation, energetics of	351
Metabolism of nucleus versus cytoplasm	309
Mode of action of chemical carcinogens	339
relation of to virus origin	339
Mortality in cattle	
inbred	108
postnatal	110
relation to environment	118
Mutable strains of bacteria	264
Nicotinic acid and chick development	177
Nicotinic acid toxicity in chick egg	183
Nuclear (desoxyribo-) nucleic acid	315
Nucleocytoplasmic interrelations in embryos	316
Nucleus and cytoplasm, biochemical and physiological interrelation during development	309
Nucleus and protein synthesis	310
Nutrition, cellular	345
and carcinogenesis	345
Onion roots, growth of, following application of electric current	155
Oocyte, metabolism of	309
Ontogeny of malignant teratomas	137
Origin of viruses	339
Paramecin	292
Paramecium, developmental mechanisms in	291
kappa factor in	294
killer character in	292
nuclear differentiation in	303
Phenomenon of enzymatic adaptation	223
Plants,	
tumor formation in	325
wound healing in	335
Pneumococcus polysaccharide, enzymes attacking	236
Pectinase production by P. Chrysogenum	229
Postnatal mortality in cattle	113
Proteases of molds	226
Relation of inbreeding to calf mortality	108
Sarcoma, chicken	353
Selection of chicks for growth experiments	89
Serum particles, demonstration of	217
Sex and postnatal mortality in cattle	111
Soil bacillus, oxidizing enzymes of	236
Specificity, biological	224
Substrate interaction	259
Substrate-induced enzyme formation	225
Substrates in enzymatic adaptation	243
Symposium on development and growth	193-337
Teratomas, ontogeny of	137

	Page
Trophoblast-soma antagonism and testicular tumors	133
Tumors,	
plant	325
testicular	133
Unfertilized egg, metabolism of	309
Unicellular organisms, demonstration of by means of electron microscope	214
Variability among enzymes	262
Viruses,	
demonstration of by means of electron microscope	216
origin	339
chick sarcoma	353
Vitamin imbalance	
toxic effects of	86
Vitamins and ontogeny	78
Vitamins, in chick egg	77
Upper limb length	
in normal white children	47
in negroes	48
in dwarfs	47
Wound healing in plants	335
Yeast	239
